SUMMARY

UX researcher in Human-Centered Computing with 4+ years of UX research experience on NSF-funded projects. Specializes in human-AI interaction and the design of data tools for analytical and decision-support workflows. Bridges empirical user research and AI system design, with a track record of published work in human-AI interaction and data tool design.

SKILLS

Research: User interviews, co-design workshops, cognitive task analysis, participant observation, usability evaluation, focus groups
Technical: Python (data analysis & visualization), Jupyter Notebook, Figma, survey design, quantitative analysis
Domains: Human-AI interaction, data tool design, analytical workflow support, data visualization, Section 508 accessibility

EDUCATION

University of Maryland, Baltimore County (UMBC) — M.S., Human-Centered Computing, GPA 3.7 | May 2024
University of Maryland, Baltimore County (UMBC) — B.A., Psychology, GPA 3.5 | Dec 2021

WORK EXPERIENCE

TEEM NSF Project | UX Researcher | Sep 2025 – Present | *NSF-Funded #2339674*

- Led interview protocol development and implementation
- Conducted and analyzed worked products to understand efficacy of agent work processes and inform AI support feature design Published: ACM SIGSCE
- Designed and evaluated AI feedback features for agentic data analytics support system

Story Studio — AI Coaching Tool | UMBC | UX Researcher | Sep 2023 – Present | *NSF-Funded #2302794 & #2302795*

- Led 10+ iterative co-design workshops with domain experts, instructors, and students to surface design challenges and validate AI feedback features across the full design cycle
- Conducted and analyzed 17+ user interviews and participant observation to understand naturalistic work processes and inform AI support feature design
- Applied cognitive task analysis and expert interviews to model data storytelling domain knowledge and design AI feedback for direct student coaching and instructor summaries — Published: ACM Learning @ Scale
- Designed and evaluated AI feedback features for data storytelling system — Published & presenting at ACM CHI 2026, Barcelona (first author)

UMBC, Affective Behavior Interaction Lab | UX Researcher | Feb 2023 – Aug 2024

- Led research and design for a health data visualization dashboard supporting sensor data interpretation and collaborative insight-sharing
- Facilitated 3 co-design workshops and 6 interviews; synthesized findings into design recommendations for data display and annotation features

Little Steps Daycare | UX Designer & Business Analyst | Feb 2020 – Aug 2024

- Designed and launched customer-facing website, online billing system, and CRM — replacing paper workflows and improving efficiency by ~30%
- Conducted competitive analysis and synthesized customer feedback to guide service design and operational decisions

LEADERSHIP & VOLUNTEERING

UMBC DARE Lab / Digital Harbor Foundation — Rec-to-Tech | UX Researcher | Jan 2022 – May 2024 | *NSF-Funded #2005502*

- Conducted interviews, focus groups, and observations with underserved youth and educators to identify engagement barriers and refine STEM curriculum design
- Collected and analyzed quantitative data measuring impact on self-efficacy, creativity, and STEM attitudes — Published: ACM CHI 2023 (second author)

UMBC Student Disability Services | UX Researcher | Sep 2023 – Jan 2024

- Led accessible design research for a 3D-printed tactile navigation map for Blind and Low Vision students (Section 508 context) — Published: ACM ASSETS 2024

HONORS & AWARDS

- 2025 - Honorable Mention (Poster) - UMBC College of Engineering and Information Technology (COEIT) Research Day
- 2023 - Student Spotlight, UMBC IS Program

TALKS & PRESENTATIONS

October 2026 Conference Paper Presentation

- "Reflection at Your Fingertips: Reducing Effort in Chronic Condition Data Engagement"
  ASSETS'26 Conference

April 2026 Conference Paper Presentation

- "Exploring Student Feedback Needs and Design Opportunities in Data Storytelling Education"
  CHI'26 Conference

November 2025 Invited Talk

- "Making Sense of Data with AI: Lowering Barriers, Expanding Who Participates"
  UMBC Neurodivergent Affinty Group

October 2025 Invited Talk

- "Making Sense of Data with AI: Lowering Barriers, Expanding Who Participates"
  AOK Library AI Symposium

April 2025 Poster Presentation

- "Reflection at Your Fingertips: Reducing Effort in Chronic Condition Data Engagement"
  College of Engineering and Information Technology (COEIT) Research Day

April 2025 Research Talk

- "Intelligent Coaching of Data Storytelling in the era of AI"
  College of Engineering and Information Technology (COEIT) Research Day

April 2025 Poster Presentation

- "Reflection at Your Fingertips: Reducing Effort in Chronic Condition Data Engagement"
  University of Maryland, Baltimore County Research Symposium
